Disclosure Document #543621

This is a camping tent with a built-in, self-inflatable, light-weight mattress. The self-inflation is a twist valve turned counter-clockwise to open and inflate, and you blow into it to finish inflation to your desired firmness. Turn valve clockwise to deflate.

The Sleeper Tent comes in various sizes, ranging from a one-sleeper tent, two-sleeper tent, four-sleeper tent, six sleeper tent, ten-sleeper tent, full floor mattress.

Built in nylon taffeta with a waterproof polyether urethane coating.

Used for camping, climbing, fishing, recreation, and out-door activities. Its built-in self-inflatable mattress is easily accessible, inflates, deflates, rolls up with your tent, and eliminates the need to carry bulky sleeping equipment.
